

SAMSUNG SHS-2320 QUICK GUIDE

No.	Name	Description
1	9V Emergency Power Port	Power can be supplied from the emergency battery after the main batteries have been completely discharged (9V alkaline battery).
2	RF Card Reader	The RF card reader will operate properly when a key tag and a RF card are placed within 20mm and within 10mm of the card reader. The recognition distance may differ depending on the card manufacturer.
3	Battery	Although actual battery life differs depending on the manufacturer, date of production and operation environment, 4 x 1.5V AA alkaline batteries can last for ten months, based on an average of 10 uses per day. Liquid leaks from batteries can damage the product. Check/replace the batteries regularly (every 6 months). Don't mix the batteries of the different brand, because it will affect the lock performance.
4	User-friendly Graphic Interface	If reading of card completes, the door opens and ☺ icon will light up on the user-friendly graphic interface. If reading of card fails, ✕ icon will light up on the user-friendly graphic interface.
5	Manual Open/Close Lever	Lever used to lock or unlock the door manually in case of any electrical failure.
6	Auto/Manual Locking Switch	This switch is used to switch between automatic locking and manual locking. If it is set for automatic locking, the door is automatically locked when closed. If it is set for manual locking, the door is not automatically locked when closed.
